PROJECTS

PDA Application Warehouse

- Facilitates Tally and Putaway operations
- Allows users to assign tasks to specific team members for streamlined execution..
- Supports Picking and Loading activities to ensure efficient order fulfillment.
- Enables Stock Transfers using pallets or individual products.
- Provides functionality to upload photos of transferred items and document damaged goods for quality assurance.
- Administrators can assign users to specific tasks, such as Tally and Putaway, ensuring accountability and task tracking.

TPM Module Web Application

- The primary feature of the TPM module is to display reports related to warehouse operations.
- It serves as a read-only interface for viewing crucial data without any editing capabilities.
- Displays detailed information about delivery notes. Includes data such as delivery dates, recipient details, and item lists.
- Provides an overview of goods received in the warehouse. Includes supplier details, receipt dates, and quantities.
- Shows the current stock levels in the warehouse. details like available quantities and locations.

Doc Gen Certificate Application

- Designed and implemented the application for generating machinery fitness certificates and inspection reports.
- Enabled test engineers to evaluate machinery using predefined checklists for systematic testing and verification.
- Developed functionality to generate PDF-based fitness certificates for approved machinery or failed inspection reports for non-compliance.
- Incorporated role-based access control with separate logins for test engineers and supervisors.

Aware Billing Module Web Application

- Enabled users to save and manage customer enquiries effectively as the starting point of the billing process.
- system generate estimates against customer enquiries.
- Developed functionality to create quotations directly from job estimations.
- Automated the process by fetching all estimation details into the quotation screen, ensuring data consistency and reducing manual entry.
- Implemented an approval mechanism requiring authorization from a designated person for quotation validation.
