SREERAG P S

Software Engineer (3+ Years) | Flutter Developer

Kochi, Kerala, India | +91 9074876825 | iamsreeragsreedhar@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Results-driven **Flutter Developer** with 3+ years of experience engineering high-performance, scalable cross-platform applications across Android, iOS, Web, and Windows. Proven track record of developing and maintaining 4+ enterprise client applications with a strong foundation in **Clean Architecture** and **MVVM** principles. Proficient in state management using **BLoC, Cubit, Provider, and GetX**, along with seamless backend integration using **Node.js** and RESTful APIs via **Dio**. Experienced in leveraging Firebase ecosystems, offline-first architectures (Hive, SQLite), and implementing rendering optimizations for smooth animations and responsive UIs. Adept at building automated CI/CD pipelines, configuring deep linking with GoRouter, and delivering stable, testable code that maximizes product reliability.

TECHNICAL SKILLS

Mobile Development:	Flutter, Dart, Android, iOS, Windows, Responsive UI/UX, Material Design, Cupertino
State Management:	BLoC, Cubit, GetX, Provider, Freezed, Equatable
Software Architecture:	Clean Architecture, MVVM, MVC, Repository Pattern, SOLID Principles, Dependency Injection
Backend & APIs:	Node.js, Express.js, RESTful APIs, Dio, HTTP, JSON Serialization, Postman
Data & Local Storage:	Firebase (Firestore, Authentication, FCM, Crashlytics, Analytics), SQLite, Hive, SharedPreferences
DevOps & Tooling:	Git, GitHub, GitHub Actions, CI/CD Pipelines, RDP Hosting, FTP Server Integration
Navigation & Features:	GoRouter (Deep Linking, Declarative Routing, Route Guards), Dynamic PDF Generation, Background Tasks
Testing & Quality:	Unit Testing, Widget Testing, Code Profiling & Optimization

WORK EXPERIENCE

Flutter Developer — Exaware Solutions Private Limited — Nov 2022 – Present | Kochi, India

- Architected, developed, and deployed 4+ scalable, multi-platform applications using Flutter with Node.js backends, maintaining high reliability and sub-second API response times.
- Delivered responsive cross-platform mobile apps optimized for Android and iOS, implementing smooth 60fps animations and platform-specific UI/UX guidelines.
- Integrated comprehensive Firebase suite (Authentication, Cloud Firestore, Cloud Messaging/FCM, Crashlytics, and Analytics), enhancing user engagement and real-time data sync.
- Engineered automated CI/CD pipelines via GitHub Actions to automate build, testing, and multi-environment deployment, cutting release cycle time by 40%.
- Followed Clean Architecture and MVVM patterns with strict separation of presentation, domain, and data layers to ensure maintainable and testable codebases.
- Developed dynamic client-side PDF report generation engines and automated secure uploading of PDF documents and inspection photos to remote FTP servers.
- Configured declarative routing and deep linking using GoRouter, implementing parameter serialization, nested navigation flows, and authentication route guards.
- Managed web application deployments and remote hosting on RDP servers, ensuring strict access control, uptime, and high availability.

KEY PROJECTS

PDA Warehouse Management Application — **Flutter Mobile | Android PDA Scanner**

Tech Stack: *Flutter, Dart, SQLite, RESTful APIs, State Management*

- Developed an industrial PDA-based application to digitize and manage end-to-end warehouse workflows: Tally, Putaway, Picking, Loading, and Stock Transfer.
- Implemented task assignment and real-time status tracking to improve warehouse floor operations, inventory accuracy, and team accountability.
- Built robust offline-first local database caching using SQLite, ensuring uninterrupted scanning and transaction queuing during network drops.

DocGen Certificate & Inspection Application — **Flutter Tablet & Windows App**

Tech Stack: *Flutter, Dart, Clean Architecture, PDF Engine, Local Storage*

- Engineered a cross-platform tablet and Windows application enabling field test engineers to evaluate machinery fitness using standardized digital checklists.
- Automated dynamic, tamper-evident PDF certificate generation for compliant and non-compliant equipment, eliminating manual paperwork.
- Integrated digital signature capture, image annotations, and automated document synchronization.

TPM Module – Web Application — **Flutter Web | Enterprise Portal**

Tech Stack: *Flutter Web, Node.js, RESTful APIs, Responsive UI*

- Developed a web-based TPM module providing centralized operational dashboards and analytics for warehouse purchase and packing operations.
- Engineered secure, role-based read-only reporting modules displaying delivery schedules, dispatch statuses, recipient details, and itemized logs.

Aware Billing Module (BQMS) — **Flutter Web | Billing & Quotation System**

Tech Stack: *Flutter Web, Node.js, REST APIs, JSON Serialization*

- Engineered a web-based billing module to capture and process customer inquiries as the foundational stage of the commercial billing lifecycle.
- Automated instant quotation and job estimate generation directly from inquiry specs, accelerating sales turnaround and eliminating pricing discrepancies.

EDUCATION

Bachelor of Computer Applications (BCA) — **2015 – 2018**
AJK College of Arts and Science

Higher Secondary Education (Plus Two – Bio Science) — **2013 – 2015**
TRK Higher Secondary School, Vaniyamkulam

LANGUAGES

English (Professional Working Proficiency) • **Malayalam** (Native / Full Professional) • **Tamil** (Working Proficiency) • **Hindi** (Working Proficiency)
